## PROFESSIONAL EXPERIENCE

### Unix Systems Administrator

TIVIT | Nov. 2024 - Present

- Manage Red Hat, SUSE Linux Enterprise, Amazon Linux, Oracle Linux, and HP-UX systems in hybrid environments.
- Administer virtualization via RHVM, VMware vSphere, Oracle VM & ESXi.
- Handle Dell iDRAC & HPE Synergy iLO enterprise platforms.
- Automate with Ansible Tower (CLI & Web) for patching, configs & deployments.
- Leverage Red Hat Satellite for lifecycle: upgrades, provisioning & compliance.
- Provision EC2, manage IAM/S3, and monitor with AWS CloudWatch.
- Use Docker for isolated services, dev/testing & CI/CD pipelines.
- Ensure security with CyberArk; maintain SLA & performance tuning.
- Monitor with Nagios, Splunk & CloudWatch; manage ITSM via Jira.
- Execute OS migrations and patching activities ensuring uptime and compliance.

### Unix Systems Administrator

Atos for Stellantis (formerly PSA) | Oct. 2023 - Oct. 2024

- Stellantis (formerly PSA) account support ensuring the correct operation of servers and applications 24x7.
- Utilized AWS EC2 for deploying and managing cloud-based virtual machines, ensuring scalable infrastructure.
- Administrator of Solaris, AIX, SUSE, and other Linux systems.
- Management of DB: (Oracle, MySQL, DB2, MSSQL, PostgreSQL, and SQLServer).
- Apache, Tomcat, Wasphere, Glassfish.
- Correction and maintenance of OSP monitoring.
- Edit and correct bash scripts.

### Linux Administrator

Hypersys Soluciones Integrales | Jan. 2023 - Sept. 2023

- Administration, maintenance, and control of GNU/Linux servers.
- Design and implementation of automation scripts in Python and Bash.
- Samba management.
- Design, support, and analysis of network infrastructure.
- Troubleshooting via OTRS.
- OpenVPN management.
- Virtualization (kvm, virtualbox, xen, vmware).
- MSSQL, MySQL, PostgreSQL, and SQLite database management.

### Supervisory Control and Data Acquisition

Mercado Libre | Jun. 2020 - Aug. 2022

- Troubleshooting software, hardware, and networking issues in IoT devices at the storage center.
- Operation, configuration, and management of SCADA systems for industrial automation and monitoring.
- Extraction of data via Virtual Machines (VMs) from S.C.A.D.A. systems.
- Resolution and ticket management using SAP.

## EDUCATION

### UADE

Computer Engineering

In progress

### E.T. N°1 Ing. Otto Krause

Electronics Technician, Telecommunications Specialization

Graduated in November 2018

## PERSONAL INFORMATION

- Date of Birth: 07/27/1999
- Location: Argentina - Buenos Aires - C.A.B.A.
